B.Tech Computer Science | KJ Somaiya College of Engineering, Vidyavihar

EDUCATION

KJ Somaiya College of Engineering, Vidyavihar 2025 – 2029
B.Tech in Computer Science **First-Year CGPA: 8.5**

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, GDScript
Web Development: HTML5, CSS3, React.js, Node.js
App Development: Flutter, Android
Databases: MySQL, MongoDB, Firebase
Game Development: Godot Engine, Unity, 2D/3D Game Development
Libraries & Tools: NumPy, Git, GitHub, VS Code, Figma

EXPERIENCE & LEADERSHIP

Somaiya Space Research Project (SSRP) 2026 – Oct 2026
Web Development & Machine Learning Team

- Contributed to the development of the SSRP website, collaborating with the Web Development and ML team over a six-month period.
- Participated in ISRO hackathon activities as part of the space research initiative.

ACM – Association for Computing Machinery Aug 2026 – Present
Media & Operations Member

- Create event posters, merchandise, promotional creatives and video content using creative design and editing tools.
- Contribute to public relations, event planning, organisation and on-ground execution of technical events.
- Helped host BTC, a domain exploration event for first-year students, and ARTEMIS, a frontend hackathon with 150+ participants.

PROJECTS

Swipe2Shop – Rural Artisan E-Commerce Platform *Web Development*

- Developed a platform connecting rural artisans with online customers, improving product visibility and helping artisans receive fair market-value pricing while reducing unfair customer bargaining.
- Independently handled full-stack development, including frontend implementation, backend development and interactive UI animations.
- *Tech Stack: HTML, CSS, JavaScript, React.js*

Secret Timeline – Repository Security Analysis Platform *Cybersecurity*

- Independently developed a repository analysis platform to identify potential sensitive-data leaks, security loopholes and repository cloning activity in public codebases.
- Designed to address repository security and exposure monitoring challenges faced by large organisations managing shared codebases.
- *Tech Stack: Python, NumPy, HTML, CSS*

VEIL – Parkour Survival Story Game *Game Development*

- Independently developed a story-driven parkour survival game featuring monster combat, exploration and survival challenges.
- *Tech Stack: Godot Engine, GDScript*

IGNIS – 2D/3D Simulation-Based Game *Game Development*

- Independently developed an immersive game where players switch between different worlds to escape a simulated reality.
- Integrated both 2D and 3D gameplay elements within a single game experience.
- *Tech Stack: Godot Engine, GDScript*

HACKATHONS & ACHIEVEMENTS

- **SIES GameJam** – 3rd Place Winner; game development competition.
- **GDG NMIMS Hackathon** – Participated with Swipe2Shop, a rural artisan marketplace.
- **Devthon, NIT Surathkal** – Participated in a blockchain-focused hackathon.
- **BitNBuild, Father Agnel** – Participated in a Web3-focused hackathon.
- **ISRO Hackathon** – Participated through the SSRP team.
